Keepers Shifted and More Than 100

Convicts Removed.

Ossining, Nov. 28.—A shakeup in keepers at Sing Sing prison and the removal of more than 100 convicts to relieve crowded conditions startled the inmates yesterday and to-day more than any other incident since the removal of former Warden McCormick.

The shift of keepers incited a temporary strike on the part of the squads affected. Many of the convicts were in such a rebellious mooi that Principal Keeper Martin Deeley was obliged to give taem the alter, tive of being locked up or going to work. They chose the latter.

Temporary Warden George S. Weed made the changes for the good of the prison service, it is said. It was intimated from other sources that the changes were anticipatory of Thomas Mott Osborne, the new warden, who is to take charge next Tuesday, following a similar course.
